1. The following is an examiner's statement of reasons for allowance: None of the prior art of record either alone or in combination discloses the combination in the independent claim specifically optical fibers that can be accessed anywhere along the cable. The applicant has shown (argument 9/25/03 page 7) to the examiner's satisfaction that the term "continuous accessibility" is definitively defined as meaning that the fibers can be accessed **anywhere** along the cable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rasanen et al teaches optical fibers in a cavity with perpendicular axis with one axis being wider than the other axis but none of the fibers is arranged so that they occupy the greater part of the cavity in the direction of the wider width. Kinard et al teaches fibers that occupy the greater part of the wider width (fig. 5) but Kinard does not teach continuous accessibility. The Japanese application teaches fibers loosely in a cavity but not in the greater part of the cavity in the wider width axis direction.
